CLAIM REJECTIONS - 35 U.S.C. § 103

Snyder

Claims 16-18, 20, 24, 26-32, 34, 35, 37, and 39 have been rejected under 35 U.S.C. § 103 as being unpatentable over U.S. Patent 3,640,389 ("Snyder"). Applicant respectfully traverses this rejection as applied to the remaining amended claims.

Applicant: Michael J. Fell
Application No.: 09/989,636

Snyder discloses a modular shelving unit having a base section (30). Snyder fails to disclose a merchandising element detachably engaged with a lateral side wall of the base. Further, Snyder fails to disclose, teach, or suggest a merchandising element engaged with any part of the base section (30). Contrary to the Examiner's assertion that the Snyder component 31 is the equivalent of Applicant's claimed merchandising element, the component identified by the Examiner is a structural front panel (31) that is not a detachably engaged merchandising element as understood by those skilled in the art. Snyder also fails to disclose, teach, or suggest a second merchandising element or any merchandising element whatsoever. Snyder absolutely fails to disclose, teach or suggest using a merchandising element that has a shape corresponding to the product being sold.

Regarding claim 16, Snyder completely fails to disclose, teach or suggest "detachably engaging a first merchandising element with to the lateral side wall of the base." As detailed above, Snyder fails to disclose, teach or suggest any merchandising elements whatsoever. The component referred to by the Examiner is just the equivalent of Applicant's claimed lateral side wall.

Claim 16 is further patentable because Snyder absolutely fails to disclose, teach or suggest any merchandising element that is shaped like a product.

Applicant: Michael J. F. II
Application No.: 09/989,636

Modifying Snyder to form Applicant's claim 16 requires the improper use of hindsight as the only suggestion for making the proposed modification is found in Applicant's disclosure. Claim 20 depends from claim 16 and, accordingly, is also patentable over Snyder.

Claim 24 is patentable over Snyder as Snyder fails to disclose, teach or suggest a first merchandising element; a second merchandising element; or any coordination of the two, as detailed above. Furthermore, Snyder fails to disclose, teach or suggest a base having a masonry appearance. Snyder utterly fails to disclose, teach or suggest an illuminated sign having a frame around a perimeter and a major surface with a translucent material thereover to define an interior for housing a light source. Modifying Snyder to form Applicant's claim 24 requires the improper use of hindsight as the only suggestion for making the proposed modification is found in Applicant's disclosure.

Claim 26 is patentable over Snyder as Snyder fails to disclose, teach or suggest a first merchandising element; a second merchandising element; or any coordination of the two, as detailed above. Furthermore, Snyder fails to disclose, teach or suggest a supporting element formed by one of a peg board or a slat wall. Modifying Snyder to form Applicant's claim 26 requires the improper use of hindsight as the only suggestion for making the proposed modification is found in

Applicant: Michael J. Fell
Application No.: 09/989,636

Applicant's disclosure.

Claim 31 is patentable over Snyder as Snyder fails to disclose, teach or suggest "a base having spaced apart opposed face portion that define a receiving slot between them which extends generally laterally entirely across a top surface of the base". Accordingly, Snyder must also fail to disclose, teach or suggest space apart opposing walls that provide upright support to the signage. Modifying Snyder to form Applicant's claim 31 requires the improper use of hindsight as the only suggestion for making the proposed modification is found in Applicant's disclosure. Claims 32, 37, and 39 depend from claim 31 and, accordingly, are also patentable over Snyder.

Applicant respectfully requests that the Examiner reconsider and withdraw this rejection.

Modifying Snyder in view of Huston to form Applicant's claim 19 requires the improper use of hindsight as the only suggestion for making the proposed modification is found in Applicant's disclosure.

Applicant respectfully requests that the Examiner reconsider and withdraw this rejection.

Modifying Snyder in view of Sourlis to form Applicant's claim 23 requires the improper use of hindsight as the only suggestion for making the proposed modification is found in Applicant's disclosure.

Applicant respectfully requests that the Examiner reconsider and withdraw this rejection.

Snyder in view of Meeker et al.

Claim 25 has been rejected under 35 U.S.C. § 103 as being unpatentable over Snyder in view of U.S. Patent 5,438,938 ("Meeker et al."). Applicant respectfully traverses this rejection as applied to the amended claim.

Accordingly, Snyder must also fail to disclose, teach or suggest space apart opposing walls that provide upright support to the signage. Modifying Snyder to form Applicant's claim 31 requires the improper use of hindsight as the only suggestion for making the proposed modification is found in Applicant's disclosure.
